

# The Industrial Choice

Warehouse, manufacturing and logistics facilities are choosing to reduce costs & injuries while increasing productivity & efficiency with the Pure Water Systems point-of-use water purification system.

## Water for Wellness™ Purified Drinking Water

- Provide your customers with fresh, pure, great tasting water.
- Continuous supply of cold and hot options – satisfying all your customer needs.

## Stay Injury-Free & OSHA-Compliant

- Avoid risk of injury by improper lifting of traditional 5-gallon bottles (weighing over 40 lbs. each).
- Stay spill-free and slip-proof with our bottleless cooler featuring a spacious dispense area

## Increase Productivity & Efficiency

- Easy and quick employee access to a continuous drinking water source – keeping everyone hydrated and operating at all times.
- Eliminate the time wasted with traditional water coolers – no more storing, tracking or replenishing of 5-gallon bottles with our point-of-use system.

## No Facility is Too Big or Too Small

- Our units can be placed nearly anywhere in your facility – accommodating the need for a water source in close proximity to workstations throughout the facility for easy and quick employee access.
- Our technicians can connect directly to your main water line for continuous fresh, pure water.
- Touchless-dispense options allow for touch-free fill-ups.
